

XM Radio is my only savior in the car while I am driving. It has a wealth of knowledge and variety. I pay for this service and I am very happy with the way that XM is evolving.

XM radio has a great business model to provide its customers with the best content at the customers discretion. They should not be limited by other broadcasters merely because they have a great product.

Please do not impair XM Radio's business plan. They bring a great variety of education and music to their audience. Limiting them will really bring down this quality way of living in America.

Please reject NAB petition 04-160.

Respectfully,

Sami Ghantous
